Education

Yale University — *New Haven, CT, USA*
Ph.D. Candidate in Applied Physics — *Sep. 2021 – Present*
Advisors: Prof. Yongshan Ding and Prof. Steven M. Girvin

University of Chicago — *Chicago, IL, USA*
Visiting Ph.D. Student; Host: Prof. Liang Jiang — *Jan. 2024 – May 2024*

Nanjing University — *Nanjing, China*
B.S. in Physics — *Sep. 2017 – Jun. 2021*

University of California, Berkeley — *Berkeley, CA, USA*
Visiting Undergraduate Student — *Jul. 2019 – Jan. 2020*

Research Experience

Yale University — *New Haven, CT*
Doctoral Research; Graduate Research Assistant — *Sep. 2021–Present*

- **Quantum memory systems.** Designed two-dimensional QRAM layouts and parallel-query scheduling (MICRO 2023; ASPLOS 2025), with Python simulators for qubit reuse and error/resource tradeoffs.
- **Magic-state factories.** Co-developed a Python compiler for bivariate bicycle codes with Kun Liu. Our ISCA 2026 work with IBM Quantum compresses the 49-to-1 distillation protocol from 13 to 7 logical qubits. Code and data.
- **Structured fault tolerance.** Developed QRAM routing-state parity checks and one-fault-tolerant controlled-SWAP gates under erasure noise (2026 preprint); contributed to qLDPC injection, routing, and heterogeneous-code architectures.
- **Current directions.** Algorithm-driven fault-tolerant architecture and full-stack qLDPC resource estimation for quantum chemical simulation, including coherent data access and magic-state delivery.

Pacific Northwest National Laboratory — *Richland, WA*
Graduate Student Intern; Mentor: Dr. Ang Li — *Jun.–Aug. 2025*

- Researched oblivious QRAM for secure delegated quantum queries, leading to the co-first-author OQRAM preprint.

Research Software & Tutorials

PennyLane / Xanadu collaboration. Developed the QRAM implementations and Python tutorial in collaboration with PennyLane, comparing select-only, bucket-brigade, and hybrid constructions through circuit simulation and resource analysis. Source code.

Shifan Xu, David Ren, Marcus Edwards, and Yongshan Ding. *Intro to quantum random access memory (QRAM)*. PennyLane Demos, August 30, 2026. Tutorial and code.

Simhybridqram. Developed a Python simulator for the MICRO 2023 QRAM architecture, including qubit reuse, error-scaling analysis, and resource tradeoff calculations. Source code.

Technical Skills

Programming languages: Python, C.
Research tools: Fault-tolerant circuit compilation; quantum circuit simulation; QRAM simulators; resource estimation with PennyLane.

Awards & Fellowships

2020 **ZhengGang Fellowship**, Nanjing University
2019 **People Scholarship**, Nanjing University
2019 **Outstanding Prize in Taiwan College Physics Experiment Tournament (TCPT)**, National Tsing Hua University
2018 **Outstanding Prize in Top-notch Talent Plan**, Nanjing University

Teaching Experience

Teaching Assistantships

Yale University *New Haven, CT, USA*
Graduate Teaching Assistant *Fall 2026*

- CPSC 4310/5310: Computer Music: Algorithmic and Heuristic Composition
- Instructor: Scott Petersen
- Guide students' programming projects through implementation discussions; grade projects and discuss assessment criteria with the instructor.

Yale University *New Haven, CT, USA*
Graduate Teaching Assistant (two offerings) *2022 – 2023*

- CPSC 4470/5470: Introduction to Quantum Computing
- Instructor: Prof. Yongshan Ding
- Contributed to homework design with the teaching team and led multiple pre-exam review sessions.

Guest Lectures

Mar. 2026. *Introduction to Quantum Query Architecture*. CPSC 4490/5490: Quantum Information Systems, Yale University. Host: Prof. Yongshan Ding.

Feb. 2025. *Introduction to Quantum Query Architecture*. CSCI 4965/6965: Quantum Computer System, Rensselaer Polytechnic Institute. Host: Prof. Zhiding Liang.

Teaching Development

Yale Certificate of College Teaching Preparation. In progress; expected December 2026. Completed the workshops and learning communities.

Mentoring

Alvin Lu *New Haven, CT, USA*
Undergraduate Student, Yale University *2024 – Present*

- Guided research from QRAM fundamentals to independent architectural exploration, leading to our *Fat-Tree QRAM* paper at ASPLOS 2025, presented by Alvin.

Università del Piemonte Orientale *Italy (remote)*
Informal Bachelor's Thesis Guidance *Jun.–Sep. 2026*

- Explained QRAM query logic and reviewed a student's parametric Qiskit implementation, checking address loading, data retrieval, and uncomputation.

Presentations

Conference Talks

Jul. 2026. *Distilling Magic States in the Bicycle Architecture*. 53rd ACM/IEEE International Symposium on Computer Architecture (ISCA).

Invited Talks

May 2026. *Error-Corrected QRAM Queries with One-Fault-Tolerant CSWAP Gates*. AFOSR QRAM MURI closeout meeting (virtual). Invited by Prof. Steven M. Girvin.

Apr. 2026. *Distilling Magic States in the Bicycle Architecture*. Invited talk hosted by the Xanadu team.

Spring 2024. *Architectural Improvements in Quantum Random Access Memory*. Invited talk at Prof. Liang Jiang's Group Meeting, University of Chicago.

Oct. 2023. *Systems Architecture for Quantum Random Access Memory*. Invited talk at QAISG's Quantum Machine Learning Seminar, Centre for Quantum Technologies, National University of Singapore.

Professional Service

Program Committee

2024. Quantum Computing Applications and Systems Workshop, co-located with the 43rd IEEE/ACM International Conference on Computer-Aided Design (ICCAD). New Jersey, USA.

Journal Refereeing

Physical Review Research
Physical Review A (**PRA**)
PRX Quantum
Physical Review Letters (**PRL**)
Physical Review X (**PRX**)
IEEE Transactions on Parallel and Distributed Systems (**TPDS**)
ACM Transactions on Design Automation of Electronic Systems (**TODAES**)
ACM Transactions on Quantum Computing (**TQC**)

Conference Reviewing

External reviewer, Quantum Information Processing (**QIP 2026**)

Earlier Research Experience

2021. Nanjing University, Physics Department, Nanjing, China. Graduation thesis: "Analysis of Background Noise in $p\bar{p}$ Collision Experiments Based on the K-Nearest Neighbors (KNN) Algorithm." Advisor: Dr. Tianjue Min.

2020. University of California, San Diego, Department of NanoEngineering (remote). Circuit Design for Flexible Ultrasonic Array. Advisor: Dr. Sheng Xu.

2019–2021. Nanjing University, Engineering Department, Nanjing, China. Preparation and Design of Auxetic Metamaterials. Advisors: Dr. Xin Li and Dr. Minghui Lu.

2018–2019. Nanjing University, Physics Department, Nanjing, China. Metal Powder Spectra Analysis. Supervisor: Prof. Sihui Wang.
